

HIGH-VALUE TRANSPORT

ENHANCED PROTECTION FOR YOUR HIGH-VALUE TRANSPORTS

ANTI-CUT PANELS THAT STOP POWER TOOLS

High-value transports are big game for criminals. And although they're often equipped with electronic alarms and sophisticated locking systems, modern power tools enable outer wall breaching in minutes. Often the robbers are gone before police or security can answer the alarm call.

WITH AVERTIC ARMOUR INSTALLED YOU GET:

- ▶ Enhanced physical security for your tobacco, pharma, electronics and alcohol transports
- ▶ More time for security or police to answer the alarm
- ▶ Less risk of operational downtime due to theft or damages
- ▶ A way to lower insurance costs

Avertic Armour is designed to make it extremely difficult to get through with any kind of power tool. It causes power tools to continually get stuck or even stall completely, which leads to abandoned attempts. Or makes the effort so time-consuming that security or police get there in time.

AVERTIC ARMOUR

Our armour technology is in active service in CIT (cash-in-transit) vehicles, HVT (high-value-transport), strong rooms, buildings and security containers. We serve clients all over the world with effective protection against even the most powerful power tools.

Avertic Armour is a thin and lightweight anti-cut panel with a patented technology that's a nightmare for criminals trying to breach it. Grinders, petrol driven cut-off saws, reciprocating saws, drills and chainsaws will be stalled or completely surrender to it.

TAILORED AND INSTALLED IN MINUTES

We tailor your anti-cut panels after your blueprints. This lets you install them in minutes with an adhesive, and minimizes waste. The panels are lighter than traditional materials such as wood and steel, which makes them easier to handle and install. The panels come in different qualities and we'll help you find the solution that best meets your needs.

Avertic Armour is relied on to protect safety deposit centers, auction houses, domestic safe rooms, commercial strong rooms, server rooms, nuclear site buildings as well as gun and evidence storage rooms. Our clients range from commercial clients, police, military and governments.

COMMON ADDITIONAL APPLICATIONS:

- > Cash-in-transit (CIT) vehicles
- > Security containers
- > Strong rooms
- > Vaults
- > Server rooms

PRODUCT INFORMATION

PROTECTION: Anti Saw, Cut & Drill,

WEIGHT: 1 900 – 3 100 g/m²
0.39 – 0.64 lbs/ft²

THICKNESS: 8 – 10 mm / 0.32 – 0.45 inch

SIZE & SHAPE: Manufactured to any size or shape according to customer drawings or specifications for perfect fit and quick mounting.

MOUNTING: Adhesives

PRODUCT RANGE/TOOLS

SHIELD: Drill

DEFENSE: Drill, 800w grinder, chainsaw

ARMOUR: Drill, 1100w grinder, chainsaw, cut off saw

SECURED: Drill, 2400w grinder, chainsaw, cut off saw, reciprocating saw

HOMELAND: Drill, 2400w grinder, chainsaw, cut off saw, reciprocating saw

PATENT PROTECTED
