

SECURITY CONTAINERS

TAKE YOUR SECURITY CONTAINERS TO THE NEXT LEVEL

ANTI-CUT PANELS THAT STOP POWER TOOLS

Modern power tools are not designed for breaking into security containers. The problem is that they're very good at it. Steel can be penetrated in minutes with the right machine. That's often fast enough for criminals to leave the scene with your client's assets – before security or police get there after the alarm goes off.

With our anti-cut panels, that scenario becomes much less likely. They cause power tools to get stuck or stall completely, which leads to abandoned attempts.

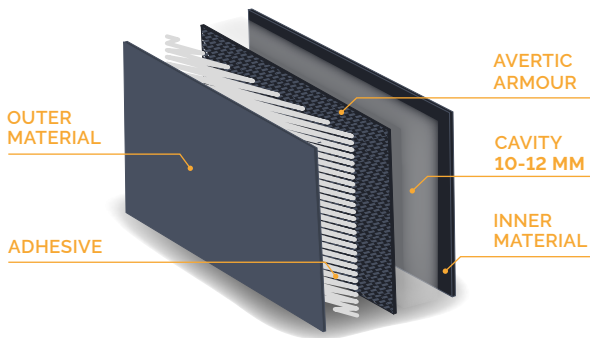

AVERTIC ARMOUR

Our armour technology is in active service in CIT (cash-in-transit) vehicles, HVT (high-value-transport), strong rooms, buildings and security containers. We serve clients all over the world with effective protection against even the most powerful power tools.

Avertic Armour is a thin and lightweight anti-cut panel with a patented technology that's a nightmare for criminals trying to breach it. Grinders, petrol driven cut-off saws, reciprocating saws, drills and chainsaws will be stalled or completely surrender to it.

INSTALL AVERTIC ARMOURS ANTI-CUT PANELS AND OFFER YOUR CLIENTS THESE BENEFITS:

- ▶ Physical security at another level, crafted to stop modern power tools
- ▶ Give security or police more time to arrive at the scene after alarms go off
- ▶ Avoid operational downtime
- ▶ A way to lower insurance costs

TAILORED AND INSTALLED IN MINUTES

We tailor your anti-cut panels after your blueprints. This lets you install them in minutes with an adhesive, and minimizes waste. The panels are lighter than traditional materials such as wood and steel, which makes them easier to handle and install. The panels come in different qualities and we'll help you find the solution that best meets your needs.

Avertic Armour is relied on to protect safety deposit centers, auction houses, domestic safe rooms, commercial strong rooms, server rooms, nuclear site buildings as well as gun and evidence storage rooms. Our clients range from commercial clients, police, military and governments.

COMMON ADDITIONAL APPLICATIONS:

- > Cash-in-transit (CIT) vehicles
- > Strong rooms
- > High-value transport
- > Vaults
- > Server rooms

PRODUCT INFORMATION

PROTECTION: Anti Saw, Cut & Drill,

WEIGHT: 1 900 – 3 100 g/m²
0.39 – 0.64 lbs/ft²

THICKNESS: 8 – 10 mm / 0.32 – 0.45 inch

SIZE & SHAPE: Manufactured to any size or shape according to customer drawings or specifications for perfect fit and quick mounting.

MOUNTING: Adhesives

PRODUCT RANGE/TOOLS

SHIELD: Drill

DEFENSE: Drill, 800w grinder, chainsaw

ARMOUR: Drill, 1100w grinder, chainsaw, cut off saw

SECURED: Drill, 2400w grinder, chainsaw, cut off saw, reciprocating saw

HOMELAND: Drill, 2400w grinder, chainsaw, cut off saw, reciprocating saw

PATENT PROTECTED
